

DIWAKAR KANDEL

Java & Spring Boot Developer | Full-Stack Engineer

Balkumari, Lalitpur, Nepal | +977 986-748-3724

kandeldiwakar7@gmail.com | linkedin.com/in/diwakarkandel

PROFESSIONAL SUMMARY

Final-year BCA student at Nepal College of Information Technology (Pokhara University) with hands-on experience in Java and Spring Boot backend development, gained through a fintech internship at eSewa. Proficient in building RESTful APIs, applying Object-Oriented Programming (OOP) principles, and designing relational databases with SQL and PostgreSQL. Strong problem-solving and collaboration skills, with a commitment to writing clean, maintainable code and contributing effectively to real-world software projects.

WORK EXPERIENCE

Java Backend Development Intern — eSewa (Fintech)

Feb 2026 – Jun 2026

- Developed and maintained backend services and RESTful APIs for a live fintech platform using Core Java and Spring Boot.
- Followed industry best practices, including OOP design patterns, clean code principles, and version control with Git.
- Collaborated with the development team on sprint-based tasks, participating in code reviews and technical discussions.
- Gained practical exposure to production-grade backend architecture and API integration within the payments and financial services domain.

Technical Support Intern — Foreign Employment Board Secretariat (GoN)

Dec 2024 – Jun 2025

- Provided day-to-day technical support to government staff, resolving hardware and software issues across the organization's IT infrastructure.
- Assisted in maintaining and troubleshooting systems, networks, and internal tools in a structured government setting.
- Strengthened communication and documentation skills by working directly with non-technical users and escalating issues appropriately.

TECHNICAL SKILLS

Backend: Java, Spring Boot, RESTful APIs, Object-Oriented Programming (OOP), JWT Authentication

Databases: SQL, PostgreSQL, MySQL (relational schema design, constraints, query writing)

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS

Other Languages: PHP, C Programming

Tools & Platforms: Git, Webpack

PROJECTS

EventConnect — Event Ticketing, Booking & Management Platform

Backend & Database Lead

Spring Boot · React.js · PostgreSQL · REST APIs

- Architected and developed the entire backend using Java and Spring Boot, including RESTful API design for event creation, ticket booking, user authentication (JWT), and role-based access control (Admin, Organizer, Attendee).
- Designed and managed the PostgreSQL relational schema — including tables for users, events, tickets, and bookings — using foreign keys and constraints, and optimizing queries for performance and scalability.
- Integrated with the React.js frontend built by teammates, ensuring clean API contracts and smooth data flow between client and server.
- Implemented core business logic: event lifecycle management, seat availability tracking, and booking confirmation workflows.

Student Record Management System

Solo Project

Java · Spring Boot · React.js · OOP

- Built a full-stack student record management application with a Spring Boot REST API backend and a React.js frontend.
- Implemented complete CRUD operations for student records, applying core OOP principles (encapsulation, classes, and objects) to keep the backend codebase clean and maintainable.
- Designed RESTful endpoints consumed by the React.js frontend, enabling seamless data management through a modern, responsive interface.

GymPal — Gym Management System

Database & Backend Developer

PHP · MySQL · HTML/CSS/JS

- Designed and implemented the MySQL relational database schema from scratch, defining tables for members, membership plans, payments, and attendance with appropriate relationships and constraints.
- Developed all backend logic in PHP — member registration, membership renewal, payment tracking, and attendance recording — using secure query practices to prevent SQL injection.
- Collaborated with teammates on the frontend (HTML/CSS/JS), ensuring backend operations aligned with UI requirements.

Employee Management System

Solo Project

PHP · MySQL · HTML/CSS/JS

- Developed a complete web-based employee records system with full CRUD functionality, a clean UI, and a PHP/MySQL backend.
- Managed employee data, including personal details, department assignment, and role information, through a straightforward and user-friendly interface.

Employee ID Record System

Solo Project

C Programming

- Built a menu-driven C console application for recording, searching, updating, and deleting employee identification data using file handling and structured data management.

EDUCATION

Bachelor of Computer Application (BCA)

2022 – 2026 (Expected)

Nepal College of Information Technology, Pokhara University

Relevant coursework: Data Structures, Algorithms, Database Management, Software Engineering, Object-Oriented Programming, Web Technologies.

+2 (Management)

2020 – 2022

Omega International College

CERTIFICATIONS & TRAINING

- Capture the Flag (CTF) Competition — NOSK, September 2024
- Digital Marketing Workshop — NSU, NCIT, June 2025
- Core Java & .NET Foundations — Nepal College of Information Technology (coursework)

CORE STRENGTHS

- Fast learner who adapts quickly to new technologies, unfamiliar codebases, and evolving project requirements.
- Clear communicator, comfortable working in cross-functional teams with both technical and non-technical stakeholders.
- Proactive problem-solver with a positive attitude toward debugging and continuous self-improvement.
